DESIGN A WEB PAGE USING HTML TAGS AND POST IT IN GITHUB

REPOSITORY

AIM

To design a web page using HTML tags and post it in GitHub Repository.

ALGORITHM

- Create a file in notepad/VS code.
- Type all the syntaxes which are required to create the website to be developed.
- Save the file in any name with html format(.html).
- Once it is saved it will be saved as html document.
- To see the output of the program which is written for the website, click the file which is
- being saved, it will be opened as website which includes all the details which were used
- in the code.
- After it is done, create a repository in GitHub and post the code in it.
- Thus, the webpage is designed and posted in GitHub repository.
